SUMMARY

Generalist product engineer who ships fast: founding engineer at a fintech startup, co-founder of a SaaS product, and AI-platform engineer at a deep-tech company. Owns everything from payment flows and mobile releases to LLM agents, infrastructure, and DevOps — built for zero-to-one.

EXPERIENCE

Aganitha Cognitive Solutions

Hyderabad, Telangana

Junior Full Stack Developer (prev. Data Scientist Intern, Jul-Dec 2025)

July 2025 – Present

- Shipped a **production web application** end-to-end and built **production ETL/RAG pipelines** with embeddings-based retrieval and a full **evaluation suite** for large-document extraction.
- Built **LLM agents and tooling** on an internal agentic framework: tool porting/registration, agent prompts, and a **tool-call caching mechanism**, running on **Slurm/Docker** clusters.

Co-founder

2025 – Present

WedTrack (wedtrack.in)

Remote

- Building a **B2B SaaS** for wedding photography agencies (client management, shoots, payments) in **Next.js/TypeScript/PostgreSQL**; own product, engineering, deployment, and customer outreach solo.

Founding Engineer (Part-Time)

October 2024 – Present

Ortus Finance (Fintech Startup)

Agartala, Tripura

- First engineer: built the company's **web app (Next.js)**, **mobile app (React Native)** shipped to the **Google Play Store**, landing pages, and internal **dashboards**.
- Implemented **Razorpay payment integration**, **background jobs**, and **AI-powered document parsing and structured data extraction**.
- Owned all **infrastructure**: AWS deployment, DNS configuration, and production release processes.

PROJECTS

Meet Caption Summarizer | Chrome Extension (MV3), LLM APIs

2026

- Built an **MV3 Chrome extension** that captures Google Meet captions in real time and produces **LLM-generated meeting summaries**.

Slack Clone | Next.js, TypeScript, WebSockets, PostgreSQL

2025

- Real-time team chat with channels, threads, and presence over **WebSockets** on a fully typed stack.

ChatWiz | React, Socket.IO, MongoDB, Node.js, JWT

2024

- Real-time chat app with **JWT auth** and persistent history supporting **500+ active users** and **10,000+ daily messages**.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL (PostgreSQL), Golang

Product: Next.js, React, React Native, Node.js, NestJS, Bun, Express, Prisma, Tailwind CSS, Payments (Razorpay/Stripe)

AI: LLM Agents, RAG, Prompt Engineering, Evals, Document Parsing, Structured Extraction, Spec-Driven Development

Infra & DevOps: Docker, AWS, Slurm, Vercel, DNS, Linux, Git, CI/CD, Play Store Releases

EDUCATION

ICFAI University

Bachelor of Technology in Computer Science and Engineering — **CGPA: 9.4**

Kamalghat, Tripura

Aug. 2021 – May 2025
